

1. The new mayor of the city likes fancy things. She wants the orange light to blink at the interval of 1s while it is on. Modify your flowchart accordingly.

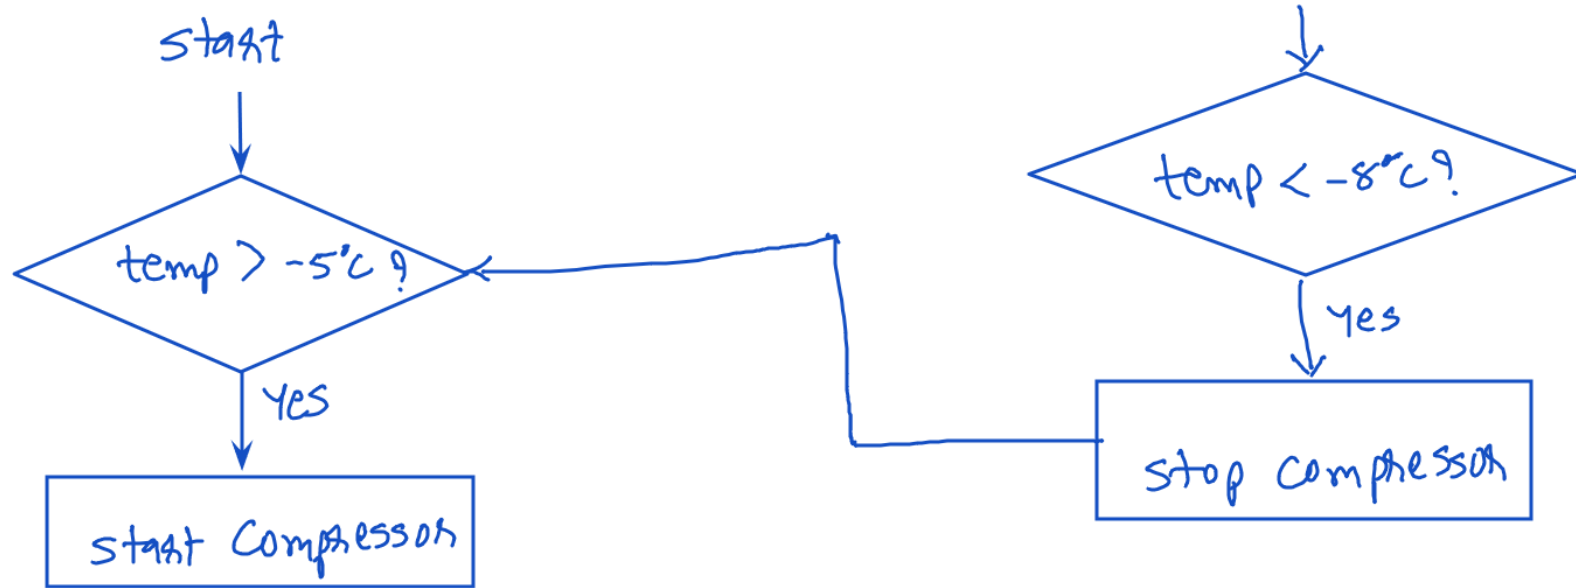

# Decision \* Making

2. Draw a flow chart that starts the compressor of a cold storage if the temperature rises more than -5 deg.

3. The cold storage owner found that some items don't stay good if the temperature falls below -8 deg. So if temperature goes lower than that, make sure you turn off the compressor.
